

Pricelist 03/2011

mega**Sun**[®]

beauty**spa**

This price list has been effective as of **March 01, 2011**.

All price lists issued prior to this date are no longer valid. The prices listed (in Euro) represent the prices for end consumers. They are based on the quotation "ex works Dernbach". We reserve the right to any technical or design modifications as well as changes in price and delivery. All KBL prices stated do not include any timer systems.

Export of KBL products – specified in this catalog – to the USA and Canada, or operation of the systems in these countries, are not permitted. KBL does not accept any manufacturer's liability in case this direction is not adhered to. It is expressly pointed out that any violation of the export/operation prohibition will involve substantial risks of liability for the exporter and/or operator.

Technical equipment and versions of the Solaria are in accordance with the legal prescriptions of the respective country of destination.

Guarantee for KBL-professional Sunbeds

From the point of delivery of the units and for a duration of 6 months, KBL AG guarantees, that by proper use the units are not affected with any mistakes, that may cancel or reduce the value or the ability for an ordinary use (except wear parts like tubes, facials, starters and acrylics). This time span will be extended to 24 months if the guarantee card is filled in and returned within the first four weeks after shipment.

All shipments are based on our general terms of trade.

FEATURES

New, really innovative features make KBL products perfect. Because demanding customers ask for more: they want to care for themselves and to indulge themselves. This world wide trend is met by KBL consequently, as the following new technologies and features show:

-  **ACS** Intelligent technology controls the intensity of the ventilation – depending on the room temperature – and also the noise level. At the beginning of the tanning session ACS ensures a gentle-up of the whole ventilation system; at the end of the session it controls the soft boot-down of the burners, tubes and the complete ventilation and aeration system.
-  **airCon** The high performance air-conditioning system guarantees a pleasant cooling during the tanning session on all megaSun-sunbeds.
-  **automatic Volume Control** This feature offers acoustic pleasure on constant level. The volume of the internal and external music players is automatically adapted to the loudness of the environment caused by the ventilating system.
-  **aquaCool** Through two special jets in the canopy (inside on the transparent cover of the lamps), which function absolutely drip-free, aquaCool produces a fine mist during the sunbathing – refreshing and revitalizing at the same time.
-  **aroma** Increase the feeling of well-being with this feature. aroma stays for concentrates in the two fragrances SUNRISE and DAYDREAM, which are sprayed off. In addition to the aroma function, you will automatically get the cabin-breeze which allows you to fill the cabin with a fragrance.
-  **backLight** backLight makes the cabin shines in a new light. With the help of coloured lamps (yellow or blue) which have been installed in the backpart of the apparatus, a colourful design is projected onto the cabin back wall.
-  **bodyCool** The new and innovative all-around ventilation by KBL with four separate air supplies gives the unrivalled kick of freshness.
-  **cpi energy** cpi energy guarantees less energy consumption, more power and longer lamp durability; it enables the adjustment to all common UV-Standards (only possible with the original lamp equipment) by using the display respectively at the push of a button.
-  **electronicPower** A bunch of innovative features – that is electronicPower. Electronic ballasts reduce energy consumption of the tubes by approx. 33% and in addition to that the weight of the solarium by approx. 100 kg. Smooth and safe operation is guaranteed even if the voltage supply is unsteady.

evoSystem² Novel reflectors for maximised balancing of operations. Purpose-built refined surfaces for even higher efficiency, evoSystem² – Power for a sensation causing, intensive and smooth tan in the facial area. Face the power!

fourSeasons fourSeasons makes it possible to experience all the colours of the rainbow. The changes in colour stimulate the well-being of your customers and make tanning a unique experience. Spring, summer, autumn and winter – experience the sensuality of colour!

megaVoice With megaVoice system you can lay back and relax just from the welcome on. A pleasant voice guides the customer through the manual functions of the solarium; mistakes impossible, well-being guaranteed – just until farewell.

mp3-Soundbox + Audio-access (incl. flex) „Listen and relax“ is the motto of the mp3-Soundbox. The mp3-player can be equipped with any kind of music by each studio operator individually. The mp3-player can be connected by using the audio access (6800 and 7900 alpha are also equipped with a headphone jack as standard).

musicVibration musicVibration is the KBL sound system, that makes you feel the vibration of the music. The system generates sound waves from vibration and thus spreads the sound more homogeneous in the tanning tunnel. Feel the elaboration of the sound experience: Feel the music!

preSelection A user friendly display is meant with this feature. It is located at the outside of the canopy. According to personal preferences, features can be selected easily and in a convenient way before sunbathing.

p2-Pigmentröhren p2 – a new type of solarium tubes. Compared to common tubes, this new technology combines perfect tanning results and the formation of vitamin D3. And what is relieving for your customer, it is really gentle on the skin.

Sun on/off With „mon amie“ the customer has the choice: Utilize the healing power of the sun and gain an attractive tone – or enjoy the pure collagen-light therapy!

USB Audio MP3-songs saved on USB sticks are getting more and more popular. KBL is meeting this trend and offers USB connectors with the solariums 6800 and 7900 alpha as a standard. Customers just connect their own USB sticks loaded with the music they love.

x-tra Tan Reflector tubes have been used in the past. Today modern high pressure lamps provide extra power and permanent tan in the shoulder area – extra smooth, extra intensive.
